

Embody Your Divine Feminine Beauty and Power:

A Women's Experiential Therapy Group for Sensitive Souls

**7-Week Committed Series with
Angela Agenlian-Neuert, MA, MFT**

***Nurture and open the pathways of your feminine energy and
relate authentically with self and others for fulfilling emotional in-to-me-see!***

Our connection to our bodies, feelings and relational capacities are some of our greatest, natural gifts. Yet our culture teaches us to reject these powerful feminine portals. This can lead us to feel isolated and disconnected from ourselves, one another and our natural world. Join me in a circle of women, in sacred space, as we engage new ways of being together to:

- relax into safety as you are welcomed for who you are, as you are
- transform and empower your life, by engaging your own inner healer
- ground, rest and delight in your body's authentic wisdom and relational intelligence
- enjoy transparently expressing your authentic self in the wild, unknown, living moment

We will weave together mindfulness and body-based awareness practices, experiential exercises, expressive arts, and effective new skills for personal and collective growth and healing.

From a great deal of personal and professional development, I have discovered an abundant array of body-based practices that can powerfully access and transform unconscious material. These include Internal Family Systems, Bill Bowen's Somatic Resourcing, aspects of Aline LaPierre's Developmental Trauma work, Women's Initiation, Compassionate Communication and Body Tales improvisational, expressive arts work.

As a result, I bring depth, relatedness, strength and sensitivity to the group field, and great passion to the healing, transformation and empowerment of the Feminine in our world today.
